

current water pressure.

Positive-Action Brine Valve

Snap-together construction eliminates use of solvents that may contaminate water. Positive action helps prevent overfilling.

Automatic Bypass During Regeneration Means Continuous Water Usage

Energy Efficient Power Supply

Simplifies installation, maintenance and reduces electrical hazards.

Hardness Reduction, and Low Lead Content

This softener has been tested and certified by NSF International against NSF/ANSI Standard 44 for hardness reduction and efficiency and NSF/ANSI 372 for low lead content.

Optional Conditioner Shroud Kit

The EEC 1502 series conditioners are available with or without an optional shroud kit to cover the resin tank and controller assembly for appearance or weather protection. Images on the right shows product with and without shroud kit option.

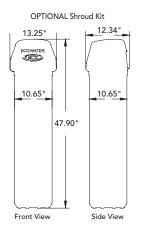

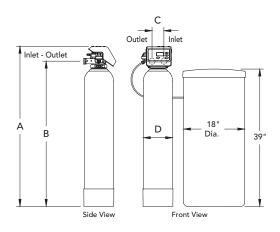

FFC1502 without OPTIONAL Shroud Kit,

EEC1502

DIMENSIONS

	EEC1502 R25	EEC1502 R40
Nominal Resin Tank Size	8" Dia. x 40"	9" Dia. x 40"
А	451/2"	47"
В	413/8"	413/4"
С	33/8"	33/4"
D	8 ¹ / ₄ " Dia.	9 ¹ / ₄ " Dia.

SPECIFICATIONS

	EEC1502R25	EEC1502R40
Efficiency (gr./lb. @ min. lb. salt dose)	5,000 @ 2.1	5,070 @ 2.3
Hardness Capacity (gr. @ max. lb. salt dose)	26,600 @ 11.2	39,000 @ 14.7
Service Flow Rate (gpm @ psi)	6 @ 10.4	9.9 @ 15
Intermittent Flow Rate (gpm @ psi)1	7.5 @ 15	9.9 @ 15
Amount of High Capacity Resin (lbs.)	36	56
Maximum Water Hardness (grains per gallon)	70	110
Maximum Clear Water Iron (ppm-Fe) ²	4	5
Maximum Clear Water Iron (ppm-Fe) ² Approximate Water Used Each Regeneration (gal.) ³	4 32	5 38
Approximate Water Used Each Regeneration (gal.)3	32	38
Approximate Water Used Each Regeneration (gal.) ³ Salt Storage Capacity (lbs.)	32 200	38
Approximate Water Used Each Regeneration (gal.) ³ Salt Storage Capacity (lbs.) Supply Water Pressure Limits (psi) ⁴	32 200 20-125	38 200 20-125

Electrical Requirement, 120V, 50/60Hz (28V DC, 350 mA, power supply included)

Intermittent flow rate does not represent the maximum service flow rate used for determining the conditioner's rated capacity and efficiency. Continuous operation at flow rates greater than the certified flow rate may affect capacity and efficiency performance. The validity of these flow rates is verified by NSF.

2 Increased amounts of clear water iron can reduce conditioners efficiency. Refer to owner's manual for details. Wisconsin requires additional treatment if water supply contains greater than 5 ppm clear water iron.

- For a period of ten years, the mineral tank will not rust, corrode, leak, burst, or in any other manner fail to perform its proper function.
- For a period of five years, the salt tank will be free of defects in materials and workmanship and will perform its proper function.
- For a period of one year, the valve body, electronic faceplate and all other parts will be free of defects in materials and workmanship and will perform their normal functions.

Your Water. Perfected.

³When operated at 35 psi water pressure.

⁴Maximum pressure for Canadian use is 1.4 - 7.0 Kg/cm2
